This book will help readers better control the negotiation of their IT products and services and, ultimately, better manage the lifecycle of those purchases. It supplies an inside look at the methods and goals of vendors and their contracts. The text is set up to follow the way most people experience technology products and contracting decisions; it explains the significance of decisions made at the time of product selection and details what to focus on when negotiating service and support agreements, describing how to use purchase orders to negotiate more favorable agreements. It covers: product acquisition, support, and maintenance; examines hardware and software warranty and support models; considers finance and accounting issues for maintenance and support; spells out technology product details; explains postwarranty support and maintenance; and provides the understanding to better negotiate with vendor sales teams. Illustrating the types of problems typically experienced during product use, the book describes how to manage support and

maintenance issues for the long term. --

MCSA/MCSE Managing and Maintaining a Windows Server 2003 Environment: Exam 70-290 Study Guide and DVD Training System is a one-of-a-kind integration of text, DVD-quality instructor led training, and Web-based exam simulation and remediation. This system gives you 100% coverage of the official Microsoft 70-290 exam objectives plus test preparation software for the edge you need to pass the exam on your first try. In June, 2003 Microsoft will launch beta exams for the Windows Server 2003 certification line. Exams will likely go live the following August and September. This launch is a comprehensive revamping of the MCSE (Microsoft Certified System Engineer) track with all new core exams and all new electives. In

addition, the MCSA (Microsoft Certified System Administrator) certification will expand its program to include an additional upgrade exam for MCSAs wanting to become MCSEs. The launch of this new certification track means that all current MCSEs, representing an installed base of approximately 200,000 (source: MCP Magazine) will need to recertify under Windows Server 2003. In addition, any MCP looking to become an MCSE--estimates are about 1.2 million (source: MCP Magazine)--will also have to continue their certifications under the new program. Many industry experts expect the Windows 2003 certification, and product line as well, to be a more popular track since many organizations are still using NT and plan to skip 2000 and go directly to 2003. * DVD Provides a \"Virtual Classroom\": Get the benefits of instructor led training at a fraction of the cost and hassle. * Guaranteed Coverage of All Exam Objectives: If the topic is listed in Microsoft's Exam 70-290 objectives, it is covered here. * Fully Integrated Learning: This system includes a study guide, DVD training and Web-based practice exams.
