

AION RESEARCHES INTO THE PHENOMENOLOGY OF THE SELF SECOND EDITION BOLLINGEN SERIES XX

Psychotherapy's Pilgrim Poet

Psychotherapy's Pilgrim-Poet: The Story Within imaginatively describes the interior experience of the therapeutic client by utilizing the images of epic literature as an interpretive lens for the psychotherapeutic process. Through the characters, plot, and psychological landscape of The Epic of Gilgamesh, Homer's Odyssey, Herman Melville's Moby-Dick, and Toni Morrison's Beloved, we look anew at the client's motivation to journey, their courage, affects, memories and wounds, the therapeutic bond, the encounter with the unconscious, and the act of story-telling. The author demonstrates that depth psychological work is a soulful pilgrimage characterized by a spiritual and heroic descent to the deep psyche in pursuit of wholeness and the authentic self. Although this book is theoretically informed, it is not intended to provide clinical explanations; rather, it aspires to describe the psychotherapeutic experience from an inside point of view, from the inner life of the client. The primary aim is to renew and deepen an understanding of the client's profoundly difficult and courageous psychological endeavor in depth psychotherapy. This book is a culmination of the author's experiences as researcher, teacher, therapist, enthused reader of epic, and most importantly, as client. It weaves together the author's personal stories with client vignettes, epic literature, depth psychology, mythological studies, and literary criticism.

Varieties of Mythic Experience - Essays on Religion, Psyche and Culture

We need a sense of myth for our individual and collective equilibrium. Sanity itself may be tied to having some kind of lively imagination so that one can feel the strange fantasies that continue to insist themselves into consciousness in both waking and dreaming states.... – from the Foreword by Robert Sardello
The essential paradox is this: Myth points to a baseline that can never be fully drawn; there exists no lowest layer for myth. – from the Introduction by Glen Slater and Dennis Patrick Slattery ... rituals in fact do not require complementary myths to 'explain' them, nor is ritual a 're-enactment' of myth, but that rituals speak eloquently in their own right. – from Chapter 3, "Rambu Solo': the Toraja Cult of the Dead and Embodied Imagination," by Laura Grillo
A myth occurs when the objective reality confuses itself with a subjective reality. The myth is, so to speak, a montage, and montages can lie – but they can inspire as well. A myth can support either revolution or the status quo; it can provoke enthusiasm or repression. – from Chapter 7, "How is Psychology a Mythology?" by Ginette Paris (Pacifica Institute)

Blake and the Assimilation of Chaos

In all of his works Blake struggled with the question of how chaos can be assimilated into imaginative order. Blake's own answer changed in the course of his poetic career. Christine Gallant contends that during the ten

year period of composition of Blake's first comprehensive epic, *The Four Zoas*, Blake's myth expanded from a closed, static system to an open, dynamic process. She further argues that it is only through attention to the changing pattern of Jungian archetypes in the poem that one can discern this profound change. Using the depth psychology of Jung, Professor Gallant presents a comprehensive interpretation of Blake's poetry from his early "Lambeth" prophecies to his mature works, *The Four Zoas*, *Milton*, and *Jerusalem*. She offers a Jungian critical approach that respects the work's autonomy, but still suggests how literature is an ongoing imaginative experience in which archetypal symbols affect their literary contexts. What interests the author is the function that the very process of mythmaking had for Blake. Professor Gallant finds that the metaphysical opposition between God and Satan in Blake's earlier work gradually evolves into an interplay of these powers in the later works. The quality of Chaos changes for Blake from something unknown and feared, contrary to Order, to something intimately known and embraced. Originally published in 1979. The Emerald Modem

Twenty years ago, in England, author Richard Leviton "discovered the planet." Following quite specific guidance, he began a long process that amounted to an apprenticeship. "My mentors dispatched me to various specific locations in the Somerset landscape, and at all hours of the night and day. I sat on hills and valleys and rocks under sunlight, moonlight, rain, snow, and fog, and had visions. I started to see another landscape behind the apparent landscape. It was an apparitional landscape with stars, planets, galaxies, angels, spirits of Nature, mythic deities, divinity." As time went on, he found himself talking with angels, visiting celestial cities, and following gnomes. He came to understand that at one level we are the planet, and that both we and it have an intimate relationship with our galaxy. "I found myself living inside the myths of the world as if they were expert scripts for real-life inner adventures. I never once thought I was crazy. Why should I? Quite the opposite. I believed I was finally getting grounded in something real. But it would take me twenty years to make sense of it. That sense is embodied in *The Emerald Modem*." *The Emerald Modem* includes: direct correspondences between human chakras and the Earth's energy features--and the galactic originalstables listing locations of sacred sites around the planet where you may experience this relationshipexplanations of world myths, which provide clues to this unsuspected visionary world around us This is the first book to synthesize all the fragments of geomantic perception (sacred sites, energy points, vertexes, etc.) into a global interactive model that ties human consciousness directly to it. Leviton describes 85 subtle features in the planetary landscape, places you can go for mystical experiences. They are features of the Earth's energy body, almost all invisible to conventional sight. But psychic cognition can be trained, and you can usefully interact with any of these types of sites today without seeing what you're doing. Your intent to interact for the benefit of yourself and the planet is all that's required. Just as modems dial us into the Internet, so the features of the Earth's energy body described in *The Emerald Modem* help us get online with the galaxy. You can learn to visit Grail Castles, experience a Mount Olympus, or walk through the stars in a landscape zodiac--and you can learn enough to become confident that you're not traveling alone.

Design & Intuition

Scholarship has sought to explain design primarily as developments and trends by understanding the influential ideas of a period. These processes are resourceful to the analysis, however they don't explain why people become attached to design and cultivate it in time. For this purpose we must also gain understanding of collective cognitive processes and the meaning of design to people. The study traces the development of respective design observed first in ancient structures, and then in interiors and artefacts that are associated to architecture by design. Design form migrates usually from technology to material culture (i.e. from buildings to interiors and crafts), though this direction is not fixed in creativity. Sometimes this pattern is not followed,

and arches, pilasters, tower crenellations and pediments appear in historic costume. Technology holds implications for visual culture, thus this study also looks at the inspiration in mechanical instruments observed in XXI century design. As the book unfolds a cultural phenomenon emerges. Architectural evocations in other crafts reflect that the public has its own dialogue with design. The attachments and responses of the public to design are many times a phenomenon worthy of being analyzed. The book gives out interesting findings about the mind and how it transforms design. It also exemplifies a new methodology for the observation of collective responses to design.

Living Happily Ever After

Joseph Campbell's *Monomythic Journey* is an adventure into the realm of the mind to mitigate the discomfort of an adaptive challenge. Psychological barriers must be overcome before creativity can flourish. We'll explore the cage of Mythlock that blinds us to new possibilities. We'll see how Scapegoatism hijacks the emotional harbingers of the creative process and vents them through anger upon any handy external entity. We'll confront the Threshold Guardians of fear that bar the threshold crossing and, if confidence is lacking, a Magic Amulet can ease the passage. Our first trial across the Garden's threshold is the Looking Glass. Here we confront the unleashed emotions of guilt, regret and anger. Our emotions must be groomed because within the Garden of the Goddess, the realm of the human mind, negative emotions can breed monsters of the mind. A negative response can transform the Goddess into a Hag. A negative attitude towards our own sensuality can transform the Goddess of promise into a Seductice tempting us into sin and depravity. The climax of the Adventure is an encounter with the Goddess in all her splendour. Everything becomes clear and an answer is manifest in all its beauty and simplicity. But the Goddess always promises more. Beyond the Goddess lies the Stairway to the Stars. This is 'Nirvana'. But the greatest challenge of all is yet to come. The exciting, and innovative ideas hatched within the realm of the mind are as nothing until they have passed through the Crucible of Reality. The real test of our Monomythic Adventure comes with the Return, when we take the Boon, those powerful insights we discovered within the Garden, and put them to actual use in the world of every day.

The Wounded Body

Explores the wounded body in literature from Homer to Toni Morrison, examining how it functions archetypally as both a cultural metaphor and a poetic image.

Collected Works of C.G. Jung, Volume 9 (Part 2)

Aion, originally published in German in 1951, is one of the major works of Jung's later years. The central theme of the volume is the symbolic representation of the psychic totality through the concept of the Self, whose traditional historical equivalent is the figure of Christ. Jung demonstrates his thesis by an investigation of the Allegoria Christi, especially the fish symbol, but also of Gnostic and alchemical symbolism, which he treats as phenomena of cultural assimilation. The first four chapters, on the ego, the shadow, and the anima and animus, provide a valuable summation of these key concepts in Jung's system of psychology.

Jung and Reich

Although contemporaries, Carl Jung and Wilhelm Reich, two giants in the field of psychoanalysis, never met. What might have happened if they had is the inspiration behind this detailed investigation. Jung and Reich succinctly outlines each man's personality and compares their lives and their work, emphasizing points of convergence between them. John Conger provocatively puts Jung's mystical and psychological approach to spiritual disciplines on the same plane as Reich's controversial theories of "genitality" and character armor. The result is a heady "what if?" bound to intrigue and inspire readers.

The Orphan

The Orphan: A Journey to Wholeness addresses loneliness and the feeling of being alone in the world, two distinct characteristics that mark the life of an orphan. Regardless if we have grown up with or without parents, we are all too likely to meet such experiences in ourselves and in our daily encounters with others. With numerous case examples, Dr. Punnett describes how loneliness and the feeling of being alone tend to be repeated in later relationships and may eventually lead to states of anxiety and depression. The main purpose of this book is not to just stay within the context of the literal orphan, but also to explore its symbolic dimensions in order to provide meaning to the diverse experiences of feeling alone in the world. In accepting the orphan within, we begin to take responsibility for our own unique life journey, a privileged journey in which one can at some point in time say with pride, I am an orphan.

The Cry of Tamar

In this comprehensive, practical, and gripping assessment of various forms of violence against women, Pamela Cooper-White challenges the Christian churches to examine their own responses to the cry of Tamar in our time. She describes specific forms of such violence and outlines appropriate pastoral responses. The second edition of this groundbreaking work is thoroughly updated and examines not only where the church has made progress since 1995 but also where women remain at unchanged or even greater risk of violence.

Ekstasy

Originally published in 1981, this study presents Jung's theory of adult personality development, and analyses and interprets in its biographical and historical context the genesis and development of Jung's theory of the individuation process. Dr Staude argues that an in-depth study of Jung's life offers insights into the patterns and processes of adult development, and he focuses particularly on Jung's writings during and immediately after his mid-life transition. He shows how Jung articulated his hard-won insights into adult development in his books and essays and into his analytic practice, and considers how Jung's developmental

theory relates to the changes he experienced in his own life and in his socio-historical environment. Dr Staude concludes that Jung's emphasis on impersonal universals of human psychic development complements and supplements the personal emphasis of ego development theory and provides the foundations for a more holistic understanding of adult developmental psychology.

The XXII International Congress for Analytical Psychology was held in Buenos Aires, Argentina, and for the first time in South America. It was also the first such congress delivered in hybrid form, bringing together IAAP members from all over the globe – in person and on screens. Guests interested in Jungian thinking from various other academic fields were invited and joined in the conversations. The theme of Opening to the Changing World was explored as we come out of a pandemic and face the imperative of fast changes to our ways of working and relating to people, living beings and the planet we inhabit. The Congress offered again ways of exploring themes via a rich programme of pre-congress workshops, masterclasses, plenary and breakout presentations and posters. The Proceedings are published as two volumes: a printed edition of the plenary presentations, and an e-book with the complete material presented at the Congress. To professionals as well as the general public, this collection of papers offers a cross-section and inspiring insight into contemporary Jungian thinking, spanning from classical theories to the latest scientific research. Buenos Aires 2022 - Analytical Psychology Opening to the Changing World: Contemporary Perspectives on Clinical, Scientific, Social, Cultural and Environmental Issues

This important new volume addresses an underappreciated dimension of Jung's work, his concept of the teleology, or "future-orientation", of psychic reality. The work, authored by an international group of Jungian scholars, expands upon the socio-cultural, psychological, therapeutic, and philosophical import of this key pillar of the Jungian oeuvre, offering a compelling alternative to current, culturally dominant ideas about how change occurs. The book addresses varied aspects of his teleological thought generally, and its application to the psychotherapeutic endeavor specifically, engaging Freudian, neo-Freudian, and related theoretical orientations in an informed dialogue about the critical issue of the emergent unfolding of subjectivity in treatment. This is an illuminating read for those interested in the study of Jungian theory, psychoanalysis, social psychology, religion, transpersonal psychology, indigenous wisdom traditions, and philosophical metapsychology.

The Roots of Morality

One of a number of major works written by Jung during his seventies in which he discusses the relationships between psychology, alchemy and religion. The particular focus in this volume is the rise of Christianity and the figure of Christ.

Psychological and Philosophical Studies of Jung's Teleology

This collection of essays, written over a period of years, entertains the shared place of psyche and poetics. Dr. Slattery has explored the manner in which the psyche is poetic and how poetry is deeply psycho-mythical. Influenced in part by the archetypal psychologist James Hillman's idea of the \"poetic basis of mind\" that comprises the soul's foundation, Slattery's writing moves into the interactive field in which myth is the ground for both psyche and poetry. The essays develop a further understanding of what has been called mythopoiesis, the fundamental myth-making and shaping capacity of the soul.

Aion

C.G. Jung saw in the cultural history of Western man a progressive evolution of its God-image. During the last ten years of his life, he wrote a series of remarkable letters about the new God-image which is now emerging through the discoveries of depth psychology. Edinger discusses fourteen of these letters with respect to the epistemological premises--modern man's new awareness of subjectivity; the paradoxical Godthe nature of the new God--image as a union of opposites; and the continuing incarnation--how the new God-image is born in individual men and women.

Creases in Culture

The Nineteenth Triannual Congress of the International Association for Analytical Psychology (IAAP) was held in Copenhagen, Denmark, from August 18-23, 2013. Copenhagen 2013 – 100 years on: Origins, Innovations and Controversies was the theme, honoring the psychological transformations experienced by C.G. Jung beginning in 1913, while also reflecting upon the evolving world and Jungian Community a century later.

The New God-image

The Romantic myth of childhood as a transhistorical holy time of innocence and spirituality, uncorrupted by the adult world, has been subjected in recent years to increasingly serious interrogation. Was there ever really a time when mythic ideals were simple, pure, and uncomplicated? The contributors to this book contend—although in widely differing ways and not always approvingly—that our culture is indeed still pervaded, in this postmodern moment of the very late twentieth century, by the Romantic conception of childhood which first emerged two hundred years ago. In the wake of the French Revolution and the Industrial Revolution, western Europe experienced another fin de siècle characterized by overwhelming material and institutional change and instability. By historicizing the specific political, social, and economic conflicts at work within the notion of Romantic childhood, the essayists in *Literature and the Child* show us how little these forces have changed over time and how enriching and empowering they can still be for children and their parents. In the first section, “Romanticism Continued and Contested,” Alan Richardson and Mitzi Myers question the origins and ends of Romantic childhood. In “Romantic Ironies, Postmodern Texts,” Dieter Petzold, Richard Flynn, and James McGavran argue that postmodern texts for both children and adults perpetuate the Romantic complexities of childhood. Next, in “The Commerce of Children's Books,” Anne Lundin and Paula Connolly study the production and marketing of children's classics. Finally, in “Romantic Ideas in Cultural Confrontations,” William Scheick and Teya Rosenberg investigate interactions of Romantic myths with those of other cultural systems.

Sulh is a centuries-old Arab-Islamic peacemaking practice. Rasha Diab explores the possibilities and limits of the rhetoric of sulh as it is used to resolve interpersonal, communal, and (inter)national conflicts--with a case illustrating each of these domains. The cases range from medieval to contemporary times and are analyzed using both rhetorical and critical discourse analyses.

In The Soul of Popular Culture, leading writers and critics, many of them influenced by the thought of C. G. Jung, draw upon the insights of depth psychology to delve into the meanings of TV programs like Star Trek and Fawltly Towers, movies such as The Piano and The Silence of the Lambs, and other contemporary media, as well as the public preoccupation with such issues as abortion, AIDS, the O.J. Simpson trial, and our enduring fascination with Elvis.

Routledge Library Editions: Jung brings together as one set, or individual volumes, a series of previously out-of-print titles, originally published between 1927 and 1993. Covering a variety of areas this set reflects the continued interest in Jung and analytical psychology, showing how Jungian theory can have influence in many walks of life. It provides in one place a number of reference sources from a range of authors, showing the development of Jung's theories over time.

The Good Wine is an exciting and challenging overview of the gospel of John. Bruno Barnhart has created a mystical roadmap of the biblical book, which is often considered the most difficult and theological of the four gospels. Following the lead of Peter Ellis, Barnhart has organized the whole of John's gospel around a single truth: that God poured divine reality into humankind through the person of Jesus Christ. This belief stands at the center of the gospel, and every episode in the narrative refracts the light of that core affirmation. The gospel, when interpreted this way, assumes a mandalic pattern in which all parts are related to the center and through it to each other. The mandalic pattern is also a gate of entry for believers who seek to relate their own destinies to the Source of Life. This book differs from other treatments of John's gospel in that its method is sapiential, following the wisdom-tradition of the church fathers. It explores the symbolic significance of the gospel and pays attention to chiasmic textures which establish patterned, repetitive relationships between narrative episodes. The result is a deeply spiritual work that explodes with flashes of illumination for persons who come to the gospel jaded with traditional scholarship.

The Golden Key to Executive Coaching is a unique contribution to the field of professional leadership development. What distinguishes Janet Steinwedel's approach is her incorporation of the lessons of depth psychology—particularly the work of Carl Jung—into her outlook and methodology. Within this accessible volume, Dr. Steinwedel also offers practical wisdom gleaned from her academic background in Human and Organizational Systems, in such corporate roles as Director of Leadership and Business Effectiveness at AstraZeneca Pharmaceuticals, Assistant Vice President of Leadership and Organization Development at Delaware Investments, and 10 years as President of Leader's Insight, her own executive coaching company. While The Golden Key is primarily written as a guide for other executive coaches, it contains much of value for all those seeking to more fully integrate their authentic selves into their professional careers. It may also serve as a "plain language" primer to the thought of Carl Jung, one of the most insightful, far-reaching minds of the 20th century. "Janet Steinwedel's The Golden Key is a profoundly useful addition to the theory and practice of coaching. What so many of her predecessors have missed is the simple, but ineluctable fact that both participants, coach and client, are human beings with their own psychological mechanisms and processes. Her book brings many of the insights of depth psychology to the practitioner who otherwise may be limited to behavioral strategies which in the end are always undermined by the human psyche. No relationships can be any more evolved than how we are related to our inner world, for what we ignore there will continue to tumble through us into the world. Steinwedel's book brings insights and tools to this collaborative process which can only deepen the coaching practice through deepening the practitioner." In 1844 a charismatic young Persian merchant from Shiraz, known as the Báb, electrified the Shí'ih world by claiming to be the return of the Hidden Twelfth Imam of Islamic prophecy. But contrary to traditional expectations of apocalyptic holy war, the Báb maintained that the spiritual path was not one of force and coercion but love and compassion. The movement he founded was the precursor of the Bahá'í Faith, but until now the Báb's own voluminous writings have been seldom studied and often misunderstood. *Gate of the Heart* offers the first in-depth introduction to the writings of the Báb. Taking an interdisciplinary approach, the author examines the Báb's major works in multifaceted context, explaining the unique theological system, mystical world view, and interpretive principles they embody as well as the rhetorical and symbolic uses of language through which the Báb radically transforms traditional concepts. Arguing that the Bábí movement went far beyond an attempt at an Islamic Reformation, the author explores controversial issues and offers conclusions that will compel a re-evaluation of some prevalent assumptions about the Báb's station, claims, and laws. Nader Saiedi's meticulous and insightful analysis identifies the key themes, terms, and concepts that characterize each stage of the Báb's writings, unlocking the code of the Báb's mystical lexicon. *Gate of the Heart* is a subtle and profound textual study and an essential resource for anyone wishing to understand the theological foundations of the Bahá'í religion and the Báb's significance in religious history. The Quotable Jung

In this collection, *Stations on the Journey of Inquiry*, David Burrell launches a revolutionary reinterpretation of how any inquiry proceeds, boldly critiquing presumptuous theories of knowledge, language, and ethics. While his later publications, *Analogy and Philosophical Language* (1973) and *Aquinas: God and Action* (1979), elucidate Aquinas's linguistic theology, these early writings show what often escapes articulation: how one comes to understanding and "takes" a judgment. Although Aquinas serves as an axial figure for Burrell's expansive corpus of scholarship spanning more than fifty years, this selection of essays presents other positions and counterpositions to whom his own philosophical theology is beholden: Plato, Aristotle, Cajetan, Kant, Peirce, Moore, Wittgenstein, Sellars, Weiss, Ross, McInerney, and Lonergan. With renewed interest in philosophy of language by postmodern thinkers as well as in the wake of Mulhall's *Stanton Lectures on Wittgenstein and "Grammatical Thomism,"* the publication of these formative writings proves timely for the academy at large. Burrell invites us to reconsider not only the way in which we conduct an inquiry, but what it is we take language to be and how we take responsibility for what we say.

This book identifies the underpinnings of such criticisms, then examines Jung's inability to respond adequately, and shows that fleshing out his theory of the transcendent function can lead to a solution. The formation of a symbol through this function orients the subject both toward unconscious depth and a transcendent horizon beyond the psyche. Finally, *Beyond the Psyche: Symbol and Transcendence* in C. G.
